EXT. SAVANA - DAY

A sprawling technological city sits almost unnaturally in a savannah on an Alien planet.

INT. COUNCIL CHAMBERS - DARK

A spotlight shines down in the center of a council chamber. Under it a single academic looking Aerolite slightly disheveled, almost if they had been rushed to the room to bargain for their standing.

Around him is a half circle table with various council members comfortably sitting in their decorated clothing signifying their various jurisdictions in the ongoing of Aerolite civilization.

COUNCIL MEMBER OF RESOURCES

(Frustrated)

And this is all you have to present after your various months of work?

COUNCIL MEMBER OF GOVERNANCE

(Frustrated)

Not only that but I do not see how this work can be utilized to thwart the Wrike invasion. Your project was marked as a possible candidate for helping the collective stop our destruction, and you were informed of this at the beginning of the war correct?

PROFESSOR BARDGESS

Well uh.. Yes of course High Council, I.. The calculations are just extremely complex, and to shift its design towards a weaponized focus.. Well you see, it just wasn't initially intended for that and

(Cutoff)

COUNCIL MEMBER OF INNOVATION

(Calmly)

That is enough Bardgess. We appreciate you coming before us today to present your progress but it is clear that your position as department head has decreased your productivity output.

(MORE)

COUNCIL MEMBER OF INOVATION (CONT'D)
 You shall be demoted two levels and
 be put back on a time check to help
 you with the progress of your
 project.

PROFESSOR BARDGESS
 I.. But I.. That isn't necessary I
 can complete it if you just give me
 till

COUNCIL MEMBER OF INOVATION
 (Calmly)
 Guards could you please make sure
 Professor Bardgess is seen safely
 back to his department?

The light harshly shining down on Bardgess is abruptly shut
 off. Two decorated constables walk up and stand in front of
 him. He reluctantly turns around and starts walking out, the
 two guards following closely behind him.

AS BARDGESS IS ESCORTED OUT THROUGH THE HALLWAY HE
 PASSES BY ANOTHER AEROLITE BY THE NAME OF SIMONE WHO
 WALKS PAST HIM

Simone looks at the other scientists frightened face and
 gulps. He stands at the end of the hallway at the entrance to
 the Council Chambers.

COUNCIL MEMEBER OF RESOURCES
 Well... Come forward.

Simone nervously walks into the center of the room, the
 spotlight claps on and shines down on him.

COUNCIL MEMBER OF GOVERNANCE
 The council recognizes Aerolite
 5021604. Nickname: Simone.
 Designation: Mechanical Engineer.

COUNCIL MEMBER OF INOVATION
 The council has been overall
 pleased at the rate of progress you
 have been making on weaponizing
 your robotics project for the Wrike
 war even though it is noted here
 that you were... 'reluctant to do
 so' at first. I reviewed a recent
 report that they were combat ready.

SIMONE
 (Humbly) Yes. Um Yes High
 Council members I have..
 (MORE)

SIMONE (CONT'D)

But I'm sorry to report
the controls are still
very unintuitive at the
moment. I still have much
to do so that an
untrained Aerolite may
yield them to their
fullest extent. And there
are various bugs that
(Cutoff)

COUNCIL MEMBER OF DEFENSE

Right right we understand. But you
see Simone, as the Leader of
Defense my seat on the Council was
instituted to put an end to the
Wrike conflict as swiftly as
possible, and we need your Robots
in the field now to expedite that.
We have.. an additional assignment
for you as part of this hearing.

COUNCIL MEMBER OF INOVATION

Every day that passes by is another
day the Wrikes could learn from the
technology in the ship they shot
down that started the war.

COUNCIL MEMEBER OF RESOURCES

We believe your bots are the
solution to getting to the ship as
fast as possible.

COUNCIL MEMBER OF DEFENSE

You would be assigned to a recently
formed squad of elite soldiers
under the order of Commander
Karoma. He will guide you through
the jungle behind enemy lines, and
make sure you reach the ship
safely.

COUNCIL MEMBER OF INOVATION

Once there you will recover any
information specifically related to
the faster than light test and then
assist in the complete destruction
of the ship.

SIMONE

...You want me. You want me to do
this?

COUNCIL MEMBER OF INOVATION

We know this is a daunting responsibility. But we understand that you were... close with one of the scientists in particular, and that you often spoke to each other about the struggles of your projects. We could think of no one better to send on the mission than someone who understands the breakthrough they were making.

SIMONE VISIBLY THINKING

COUNCIL MEMBER OF INOVATION (CONT'D)

There would be no better way of honoring them Simone.

COUNCIL MEMBER OF GOVERNANCE

If you succeed you will be promoted three levels and be made head of the Mechanics Department. If you refuse your project will be commandeered and we will assign you to something else. You must decide now.

SIMONE

This Squad, is going to go on this mission, with my robots, regardless?

COUNCIL MEMBER OF GOVERNANCE

Correct.

SIMONE

I.. I'll. I'll do it.

COUNCIL MEMBER OF INOVATION'

Excellent Simone. You may return to your quarters and prepare your bots. They will be picked up later this evening and you will be transported to a border base in the morning.
